

# Payment Card Industry Data Security Standard

# Self-Assessment Questionnaire B and Attestation of Compliance

For use with PCI DSS Version 4.0 Publication Date: April 2022

# **Document Changes**

Date	PCI DSS Version	SAQ Revision	Description	
October 2008	1.2		To align content with new PCI DSS v1.2 and to implement minor changes noted since original v1.1.	
October 2010	2.0		To align content with new PCI DSS v2.0 requirements and testing procedures.	
February 2014	3.0		To align content with PCI DSS v3.0 requirements and testing procedures and incorporate additional response options.	
April 2015	3.1		Updated to align with PCI DSS v3.1. For details of PCI DSS changes, see PCI DSS – Summary of Changes from PCI DSS Version 3.0 to 3.1.	
July 2015	3.1	1.1	Updated to remove references to "best practices" prior to June 30, 2015.	
April 2016	3.2	1.0	Updated to align with PCI DSS v3.2. For details of PCI DSS changes, see PCI DSS – Summary of Changes from PCI DSS Version 3.1 to 3.2.	
January 2017	3.2	1.1	Updated version numbering to align with other SAQs.	
June 2018	3.2.1	1.0	Updated to align with PCI DSS v3.2.1. For details of PCI DSS changes, see PCI DSS – Summary of Changes from PCI DSS Version 3.2 to 3.2.1.	
			Updated to align with PCI DSS v4.0. For details of PCI DSS changes, see PCI DSS – Summary of Changes from PCI DSS Version 3.2.1 to 4.0.	
April 2022	4.0		Rearranged, retitled, and expanded information in the "Completing the Self-Assessment Questionnaire" section (previously titled "Before You Begin").	
p 2022			Aligned content in Sections 1 and 3 of Attestation of Compliance (AOC) with PCI DSS v4.0 Report on Compliance AOC.	
			Added PCI DSS v4.0 requirements.	
			Added appendices to support new reporting responses.

# **Completing the Self-Assessment Questionnaire**

# Merchant Eligibility Criteria for Self-Assessment Questionnaire B

Self-Assessment Questionnaire (SAQ) B includes only those PCI DSS requirements applicable to merchants that process account data only via imprint machines or standalone, dial-out terminals. SAQ B merchants may be either brick-and-mortar (card-present) or mail/telephone order (card-not-present) merchants, and do not store account data on any computer system.

# This SAQ is not applicable to e-commerce channels.

# This SAQ is not applicable to service providers.

SAQ B merchants confirm that, for this payment channel:

- The merchant uses only an imprint machine and/or uses only standalone, dial-out terminals (connected via a phone line to the merchant processor) to take customers' payment card information;
- The standalone, dial-out terminals are not connected to any other systems within the merchant environment;
- The standalone, dial-out terminals are not connected to the Internet;
- The merchant does not store account data in electronic format, and
- Any account data the merchant might retain is on paper (for example, printed reports or receipts), and these documents are not received electronically.

This SAQ includes only those requirements that apply to a specific type of merchant environment, as defined in the above eligibility criteria. If there are PCI DSS requirements applicable to the cardholder data environment that are not covered in this SAQ, it may be an indication that this SAQ is not suitable for the merchant's environment.

# Defining Account Data, Cardholder Data, and Sensitive Authentication Data

PCI DSS is intended for all entities that store, process, or transmit cardholder data (CHD) and/or sensitive authentication data (SAD) or could impact the security of the cardholder data environment (CDE). Cardholder data and sensitive authentication data are considered account data and are defined as follows:

Account Data				
Cardholder Data includes:	Sensitive Authentication Data includes:			
Primary Account Number (PAN)	• Full track data (magnetic-stripe data or equivalent on a chip)			
Cardholder Name	Card verification code			
Expiration Date	PINs/PIN blocks			
Service Code				

Refer to PCI DSS Section 2, PCI DSS Applicability Information, for further details.

# PCI DSS Self-Assessment Completion Steps

- 1. Confirm by review of the eligibility criteria in this SAQ and the *Self-Assessment Questionnaire Instructions and Guidelines* document on the PCI SSC website that this is the correct SAQ for the merchant's environment.
- 2. Confirm that the merchant environment is properly scoped.
- 3. Assess the environment for compliance with PCI DSS requirements.
- 4. Complete all sections of this document:
  - Section 1: Assessment Information (Parts 1 & 2 of the Attestation of Compliance (AOC) Contact Information and Executive Summary).
  - Section 2:Self-Assessment Questionnaire B.
  - Section 3: Validation and Attestation Details (Parts 3 & 4 of the AOC PCI DSS Validation and Action Plan for Non-Compliant Requirements (if Part 4 is applicable)).
- 5. Submit the SAQ and AOC, along with any other requested documentation—such as ASV scan reports—to the requesting organization (those organizations that manage compliance programs such as payment brands and acquirers).

# **Expected Testing**

The instructions provided in the "Expected Testing" column are based on the testing procedures in PCI DSS and provide a high-level description of the types of testing activities that a merchant is expected to perform to verify that a requirement has been met.

The intent behind each testing method is described as follows:

- Examine: The merchant critically evaluates data evidence. Common examples include documents (electronic or physical), screenshots, configuration files, audit logs, and data files.
- Observe: The merchant watches an action or views something in the environment. Examples of
  observation subjects include personnel performing a task or process, system components performing a
  function or responding to input, environmental conditions, and physical controls.

 Interview: The merchant converses with individual personnel. Interview objectives may include confirmation of whether an activity is performed, descriptions of how an activity is performed, and whether personnel have particular knowledge or understanding.

The testing methods are intended to allow the merchant to demonstrate how it has met a requirement. The specific items to be examined or observed and personnel to be interviewed should be appropriate for both the requirement being assessed and the merchant's particular implementation.

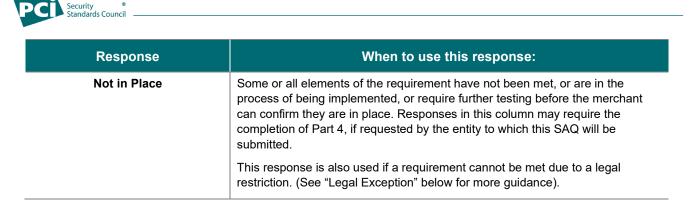

Full details of testing procedures for each requirement can be found in PCI DSS.

# **Requirement Responses**

For each requirement item, there is a choice of responses to indicate the merchant's status regarding that requirement. *Only one response should be selected for each requirement item.* 

A description of the meaning for each response and when to use each response is provided in the table below:

Response	When to use this response:	
In Place	The expected testing has been performed, and all elements of the requirement have been met as stated.	
In Place with CCW (Compensating Controls Worksheet)	The expected testing has been performed, and the requirement has been met with the assistance of a compensating control. All responses in this column require completion of a Compensating Controls	
	Worksheet (CCW) in Appendix B of this SAQ. Information on the use of compensating controls and guidance on how to complete the worksheet is provided in PCI DSS Appendices B and C.	
In Place with Remediation	The requirement was Not in Place when the expected testing was initially performed, but the merchant addressed the situation and put processes in place to prevent re-occurrence prior to completion of the self-assessment. In all cases of In Place with Remediation, the merchant has identified and addressed the reason the control failed, has implemented the control, and has implemented ongoing processes to prevent re-occurrence of the control failure. All responses in this column require a supporting explanation in Appendix C of this SAQ.	
Not Applicable	The requirement does not apply to the merchant's environment. (See "Guidance for Not Applicable Requirements" below for examples.) All responses in this column require a supporting explanation in Appendix D of this SAQ.	
Not Tested	The response is not applicable to, and not included as an option for, this SAQ. This SAQ was created for a specific type of environment based on how the merchant stores, processes, and/or transmits account data and defines the specific PCI DSS requirements that apply for this environment. Consequently, all requirements in this SAQ must be tested.	

# Guidance for Not Applicable Requirements

If any requirements do not apply to the merchant's environment, select the Not Applicable option for that specific requirement. For example, in this SAQ, requirements for securing all media with cardholder data (requirements 9.4.1 - 9.4.6) only apply if a merchant stores paper media with cardholder data; if paper media is not stored, the merchant can select Not Applicable for those requirements.

For each response where Not Applicable is selected in this SAQ, complete *Appendix D: Explanation of Requirements Noted as Not Applicable*.

# Legal Exception

If your organization is subject to a legal restriction that prevents the organization from meeting a PCI DSS requirement, select Not in Place for that requirement and complete the relevant attestation in Section 3, Part 3 of this SAQ.

**Note:** A legal restriction is one where meeting the PCI DSS requirement would violate a local or regional law or regulation.

Contractual obligations or legal advice are not legal restrictions.

# Use of the Customized Approach

SAQs cannot be used to document use of the Customized Approach to meet PCI DSS requirements. For this reason, the Customized Approach Objectives are not included in SAQs. Entities wishing to validate using the Customized Approach may be able to use the PCI DSS Report on Compliance (ROC) Template to document the results of their assessment.

Use of the Customized Approach is not supported in SAQs.

The use of the customized approach may be regulated by organizations that manage compliance programs, such as payment brands and acquirers. Questions about use of a customized approach should always be referred to those organizations. This includes whether an entity that is eligible for an SAQ may instead complete a ROC to use a customized approach, and whether an entity is required to use a QSA, or may use an ISA, to complete an assessment using the customized approach. Information about the use of the Customized Approach can be found in Appendix D and E of PCI DSS.

# **Additional PCI SSC Resources**

Additional resources that provide guidance on PCI DSS requirements and how to complete the self-assessment questionnaire have been provided below to assist with the assessment process.

Resource	Includes:	
PCI Data Security Standard Requirements and Testing Procedures (PCI DSS)	<ul> <li>Guidance on Scoping</li> <li>Guidance on the intent of all PCI DSS Requirements</li> <li>Details of testing procedures</li> <li>Guidance on Compensating Controls</li> <li>Appendix G: Glossary of Terms, Abbreviations, and Acronyms</li> </ul>	
SAQ Instructions and Guidelines	<ul> <li>Information about all SAQs and their eligibility criteria</li> <li>How to determine which SAQ is right for your organization</li> </ul>	
Frequently Asked Questions (FAQs)	<ul> <li>Guidance and information about SAQs.</li> </ul>	
Online PCI DSS Glossary	<ul> <li>PCI DSS Terms, Abbreviations, and Acronyms</li> </ul>	
Information Supplements and Guidelines	<ul> <li>Guidance on a variety of PCI DSS topics including:         <ul> <li>Understanding PCI DSS Scoping and Network Segmentation</li> <li>Third-Party Security Assurance</li> <li>Multi-Factor Authentication Guidance</li> <li>Best Practices for Maintaining PCI DSS Compliance</li> </ul> </li> </ul>	
Getting Started with PCI	<ul> <li>Resources for smaller merchants including:         <ul> <li>Guide to Safe Payments</li> <li>Common Payment Systems</li> <li>Questions to Ask Your Vendors</li> <li>Glossary of Payment and Information Security Terms</li> <li>PCI Firewall Basics</li> </ul> </li> </ul>	

These and other resources can be found on the PCI SSC website (www.pcisecuritystandards.org).

Organizations are encouraged to review PCI DSS and other supporting documents before beginning an assessment.

# **Section 1: Assessment Information**

# Instructions for Submission

This document must be completed as a declaration of the results of the merchant's self-assessment against the *Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures.* Complete all sections. The merchant is responsible for ensuring that each section is completed by the relevant parties, as applicable. Contact the entity(ies) to which the Attestation of Compliance (AOC) will be submitted for reporting and submission procedures.

# Part 1. Contact Information

Part 1a. Assessed Merchant		
Company name:		
DBA (doing business as):		
Company mailing address:		
Company main website:		
Company contact name:		
Company contact title:		
Contact phone number:		
Contact e-mail address:		

# Part 1b. Assessor

Provide the following information for all assessors involved in the assessment. If there was no assessor for a given assessor type, enter Not Applicable.

PCI SSC Internal Security Assessor(s)			
ISA name(s):			
Qualified Security Assessor			
Company name:			
Company mailing address:			
Company website:			
Lead Assessor Name:			
Assessor phone number:			
Assessor e-mail address:			
Assessor certificate number:			

# Part 2. Executive Summary

# Part 2a. Merchant Business Payment Channels (select all that apply):

Indicate all payment channels used by the business that are included in this assessment.

Mail order/telephone order (MOTO)

Card-present

Are any payment channels not included in this assessment?	☐ Yes	∏ No		
If yes, indicate which channel(s) is not included in the				
assessment and provide a brief explanation about why the channel was excluded.				

**Note:** If the organization has a payment channel that is not covered by this SAQ, consult with the entity(ies) to which this AOC will be submitted about validation for the other channels.

# Part 2b. Description of Role with Payment Cards

For each payment channel included in this assessment as selected in Part 2a above, describe how the business stores, processes and/or transmits account data.

Channel	How Business Stores, Processes, and/or Transmits Account Data		

Part 2c. Description of Payment Card Environment			
Provide a <i>high-level</i> description of the environment covered by this assessment.			
For example:			
<ul> <li>Connections into and out of the cardholder data environment (CDE).</li> </ul>			
<ul> <li>Critical system components within the CDE, such as POI devices, databases, web servers, etc., and any other necessary payment components, as applicable.</li> </ul>			
<ul> <li>System components that could impact the security of account data.</li> </ul>			
Indicate whether the environment includes segmentation to reduce the scope of the assessment.		🗌 Yes	🗌 No
(Refer to "Segmentation" section of PCI DSS for guidance on segmentation.)			

# Part 2. Executive Summary (continued)

# Part 2d. In-Scope Locations/Facilities

List all types of physical locations/facilities (for example, corporate offices, data centers, call centers, and mail rooms) in scope for the PCI DSS assessment.

Facility Type	<b>Total number of locations</b> (How many locations of this type are in scope)	Location(s) of facility (city, country)
Example: Data centers	3	Boston, MA, USA

# Part 2e. PCI SSC Validated Products and Solutions

Does the merchant use any item identified on any PCI SSC Lists of Validated Products and Solutions\*?

# 🗌 Yes 🗌 No

Provide the following information regarding each item the merchant uses from PCI SSC's Lists of Validated Products and Solutions.

Name of PCI SSC- validated Product or Solution	Version of Product or Solution	PCI SSC Standard to which product or solution was validated	PCI SSC listing reference number	Expiry date of listing (YYYY-MM-DD)

<sup>•</sup> For purposes of this document, "Lists of Validated Products and Solutions" means the lists of validated products, solutions, and/or components appearing on the PCI SSC website (<u>www.pcisecuritystandards.org</u>)—for example, 3DS Software Development Kits, Approved PTS Devices, Validated Payment Software, Payment Applications (PA-DSS), Point to Point Encryption (P2PE) solutions, Software-Based PIN Entry on COTS (SPoC) solutions, and Contactless Payments on COTS (CPoC) solutions.

# Part 2. Executive Summary (continued)

# Part 2f. Third-Party Service Providers

Does the merchant have relationships with one or more third-party service providers that:

•	Store, process, or transmit account data on the merchant's behalf (for example, payment gateways, payment processors, payment service providers (PSPs), and off-site storage).	🗌 Yes	🗌 No
•	Manage system components included in the scope of the merchant's PCI DSS assessment—for example, via network security control services, anti-malware services, security incident and event management (SIEM), contact and call centers, web-hosting services, and IaaS, PaaS, SaaS, and FaaS cloud providers.	🗌 Yes	□ No
•	Could impact the security of the merchant's CDE (for example, vendors providing support via remote access, and/or bespoke software developers)	🗌 Yes	□ No

#### If Yes:

Name of service provider:	Description of service(s) provided:

Note: Requirement 12.8 applies to all entities in this list.

# Part 2. Executive Summary (continued)

# Part 2g. Summary of Assessment

(SAQ Section 2 and related appendices)

#### Indicate below all responses that were selected for each PCI DSS requirement.

PCI DSS Requirement *	Requirement Responses More than one response may be selected for a given requirement. Indicate all responses that apply.										
Kequirement	In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place						
Requirement 3:											
Requirement 7:											
Requirement 9:											
Requirement 12:											

\* PCI DSS Requirements indicated above refer to the requirements in Section 2 of this SAQ.

# Part 2h. Eligibility to Complete SAQ B

Merchant certifies eligibility to complete this Self-Assessment Questionnaire because, for this payment channel:

The merchant uses only an imprint machine <b>and/or</b> uses only standalone, dial-out terminals (connected via a phone line the merchant processor) to take customers' payment card information.
The standalone, dial-out terminals are not connected to any other systems within the merchant environment.
The standalone, dial-out terminals are not connected to the Internet.
The merchant does not store account data in electronic format.
Any account data the merchant might retain is on paper (for example, printed reports or receipts), and these documents are not received electronically.

# Section 2: Self-Assessment Questionnaire B

*Note:* The following requirements mirror the requirements in the PCI DSS Requirements and Testing Procedures document.

#### Self-assessment completion date: YYYY-MM-DD

# **Protect Account Data**

# **Requirement 3: Protect Stored Account Data**

Note: For SAQ B, Requirement 3 applies only to merchants with paper records that include account data (for example, receipts or printed reports).

	PCI DSS Requirement	Expected Testing	<b>Response*</b> (Check one response for each requirement)						
rci bas keyünement			In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place		
3.1 Pro	cesses and mechanisms for protecting stored account data	a are defined and understood.							
3.1.1	All security policies and operational procedures that are identified in Requirement 3 are:	<ul><li>Examine documentation.</li><li>Interview personnel.</li></ul>							
	Documented.								
	Kept up to date.								
	In use.								
	Known to all affected parties.								

#### SAQ Completion Guidance:

Selection of any of the In Place responses for Requirement 3.1.1 means that, if the merchant has paper storage of account data, the merchant has policies and procedures in place that govern merchant activities for Requirement 3. This helps to ensure personnel are aware of and following security policies and documented operational procedures for managing the secure storage of any paper records with account data.

If merchant does not store paper records with account data, mark this requirement as Not Applicable and complete Appendix D: Explanation of Requirements Noted as Not Applicable.

<sup>•</sup> Refer to the "Requirement Responses" section (page v) for information about these response options.

	PCI DSS Requirement	Expected Testing		(Check one n	<b>Response</b> <sup>+</sup> esponse for each	requirement)	
	Poi boo Requirement		In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
<b>3.3</b> Sens	itive authentication data (SAD) is not stored after authoriz	ration.					
3.3.1	SAD is not retained after authorization, even if encrypted. All sensitive authentication data received is rendered unrecoverable upon completion of the authorization process.	<ul> <li>Examine documented policies and procedures.</li> <li>Examine system configurations.</li> <li>Observe the secure data deletion processes.</li> </ul>					
	Applicability Notes						
	Part of this Applicability Note was intentionally blank for merchant assessments. Sensitive authentication data includes the data cited in 3.3.1.3.						
3.3.1.1	The full contents of any track are not retained upon completion of the authorization process.	Examine data sources.					
	Applicability Notes						
	In the normal course of business, the following data ele be retained:	ments from the track may need to					
	<ul><li>Cardholder name.</li><li>Primary account number (PAN).</li></ul>						
	<ul><li>Expiration date.</li><li>Service code.</li></ul>						
	To minimize risk, store securely only these data element	1					
3.3.1.2	The card verification code is not retained upon completion of the authorization process.	Examine data sources.					
	Applicability Notes						
	The card verification code is the three- or four-digit number printed on the front or back of a payment card used to verify card-not-present transactions.						

PCI DSS Requirement	Expected Testing	<b>Response*</b> (Check one response for each requirement)								
		In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place				
SAQ Completion Guidance:										
Selection of any of the In Place responses for Requirement 3.3.1.2 being conducted, the merchant either securely destroys the paper the code (for example, by "blacking it out" with a marker) before th	(for example, with a shredder) imme									
If the merchant never requests the three-digit or four-digit number printed on the front or back of a payment card ("card verification code"), mark the requirement as Not Applicable column and complete Appendix D: Explanation of Requirements Noted as Not Applicable.										
		1	1	1		1				

3.3.1.3	The personal identification number (PIN) and the PIN block are not retained upon completion of the authorization process.	Examine data sources.			
	Applicability Notes				
	PIN blocks are encrypted during the natural course of tr an entity encrypts the PIN block again, it is still not allow completion of the authorization process.				

	PCI DSS Requirement		Expected Testing	Response* (Check one response for each requirement)						
	Por boo requirement		Expected reating	In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place		
<b>3.4</b> Acc	ess to displays of full PAN and ability to copy PAN is restri	cteo	d.							
3.4.1	PAN is masked when displayed (the BIN and last four digits are the maximum number of digits to be displayed), such that only personnel with a legitimate business need can see more than the BIN and last four digits of the PAN.	•	configurations. Examine the documented list of roles that need access to more than the BIN and last four digits of the PAN (includes full PAN). Examine displays of PAN (for example, on screen, on							
	Applicability Notes		paper receipts).							
This requirement does not supersede stricter requirement cardholder data—for example, legal or payment brand rec (POS) receipts.										
	This requirement relates to protection of PAN where it is receipts, printouts, etc., and is not to be confused with F PAN when stored, processed, or transmitted.									

# Implement Strong Access Control Measures

# Requirement 7: Restrict Access to System Components and Cardholder Data by Business Need to Know

	PCI DSS Requirement	Expected Testing		<b>Response*</b> (Check one response for each requirement)					
				In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place

7.2.2	<ul> <li>Access is assigned to users, including privileged users, based on:</li> <li>Job classification and function.</li> <li>Least privileges necessary to perform job responsibilities.</li> </ul>	•	Examine policies and procedures. Examine user access settings, including for privileged users. Interview responsible management personnel. Interview personnel responsible for assigning access.						

<sup>\*</sup> Refer to the "Requirement Responses" section (page v) for information about these response options.

# Requirement 9: Restrict Physical Access to Cardholder Data

	PCI DSS Requirement	Expected Testing	(0	<b>Response⁺</b> (Check one response for each requirement)					
				In Place with CCW	In Place with Remediation	Not Applicable	Not in Place		
<b>9.4</b> Medi	a with cardholder data is securely stored, accessed, dist	ributed, and destroyed.							
	or SAQ B, Requirements at 9.4 only apply to merchants v account numbers (PANs).	with paper records (for example, receipt	s or print	ed reports) v	with account d	ata, including	1		
9.4.1	All media with cardholder data is physically secured.	Examine documentation.							
9.4.1.1	Offline media backups with cardholder data are stored in a secure location.	<ul> <li>Examine documented procedures.</li> <li>Examine logs or other documentation.</li> <li>Interview responsible personnel at the storge location(s).</li> </ul>							
9.4.2	All media with cardholder data is classified in accordance with the sensitivity of the data.	<ul> <li>Examine documented procedures.</li> <li>Examine media logs or other documentation.</li> </ul>							
9.4.3	<ul> <li>Media with cardholder data sent outside the facility is secured as follows:</li> <li>Bullet intentionally left blank for this SAQ.</li> <li>Media is sent by secured courier or other delivery method that can be accurately tracked.</li> <li>Bullet intentionally left blank for this SAQ.</li> </ul>	<ul> <li>Examine documented procedures.</li> <li>Interview personnel.</li> <li>Examine records.</li> <li>Examine offsite tracking logs for all media.</li> </ul>							

<sup>\*</sup> Refer to the "Requirement Responses" section (page v) for information about these response options.

	PCI DSS Requirement	Expected Testing	(0	Check one re	<b>Response</b> * esponse for ea	ch requireme	ent)
	roi Doo Requirement		In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
9.4.4	Management approves all media with cardholder data that is moved outside the facility (including when media is distributed to individuals).	<ul> <li>Examine documented procedures.</li> <li>Examine offsite media tracking logs.</li> <li>Interview responsible personnel.</li> </ul>					
	Applicability Notes						
	Individuals approving media movements should have a authority to grant this approval. However, it is not spec have "manager" as part of their title.						
9.4.6	<ul> <li>Hard-copy materials with cardholder data are destroyed when no longer needed for business or legal reasons, as follows:</li> <li>Materials are cross-cut shredded, incinerated, or pulped so that cardholder data cannot be reconstructed.</li> <li>Materials are stored in secure storage containers prior to destruction.</li> </ul>	<ul> <li>Examine the periodic media destruction policy.</li> <li>Observe processes.</li> <li>Interview personnel.</li> <li>Observe storage containers.</li> </ul>					
	Applicability Notes						
	These requirements for media destruction when that m or legal reasons are separate and distinct from PCI DS securely deleting cardholder data when no longer need retention policies.	SS Requirement 3.2.1, which is for					

#### SAQ Completion Guidance:

Selection of any of the In Place responses for Requirements at 9.4 means that the merchant securely stores any paper media with account data, for example by storing the paper in a locked drawer, cabinet, or safe, and that the merchant destroys such paper when no longer needed for business purposes. This includes a written document or policy for employees, so they know how to secure paper with account data and how to destroy the paper when no longer needed.

If the merchant never stores any paper with account data, mark the requirement as Not Applicable and complete Appendix D: Explanation of Requirements Noted as Not Applicable.

	PCI DSS Requirement	Expected Testing	(0	Check one re	<b>Response</b> *		ent)
			In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
9.5 Point-c	of-interaction (POI) devices are protected from tamperi	ng and unauthorized substitution.					
9.5.1	<ul> <li>POI devices that capture payment card data via direct physical interaction with the payment card form factor are protected from tampering and unauthorized substitution, including the following:</li> <li>Maintaining a list of POI devices.</li> <li>Periodically inspecting POI devices to look for tampering or unauthorized substitution.</li> <li>Training personnel to be aware of suspicious behavior and to report tampering or unauthorized substitution of devices.</li> </ul>	Examine documented policies and procedures.					
	Applicability Notes		-				
	These requirements apply to deployed POI devices (that is, a payment card form factor such as a card t requirement is not intended to apply to manual PAN computer keyboards.	hat is swiped, tapped, or dipped). This					
	This requirement is recommended, but not required, components such as computer keyboards.	, for manual PAN key-entry					
	This requirement does not apply to commercial off-th smartphones or tablets), which are mobile merchant market distribution.						
9.5.1.1	<ul> <li>An up-to-date list of POI devices is maintained, including:</li> <li>Make and model of the device.</li> <li>Location of device.</li> <li>Device serial number or other methods of unique identification.</li> </ul>	<ul> <li>Examine the list of POI devices.</li> <li>Observe POI devices and device locations.</li> <li>Interview personnel.</li> </ul>					
9.5.1.2	POI device surfaces are periodically inspected to detect tampering and unauthorized substitution.	<ul> <li>Examine documented procedures.</li> <li>Interview responsible personnel.</li> <li>Observe inspection processes.</li> </ul>					

	PCI DSS Requirement	Expected Testing	(C	check one re	Response*	ch requireme	ent)
			In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
9.5.1.3	<ul> <li>Training is provided for personnel in POI environments to be aware of attempted tampering or replacement of POI devices, and includes:</li> <li>Verifying the identity of any third-party persons claiming to be repair or maintenance personnel, before granting them access to modify or troubleshoot devices.</li> <li>Procedures to ensure devices are not installed, replaced, or returned without verification.</li> <li>Being aware of suspicious behavior around devices.</li> <li>Reporting suspicious behavior and indications of device tampering or substitution to appropriate personnel.</li> </ul>	<ul> <li>Review training materials for personnel in POI environments.</li> <li>Interview responsible personnel.</li> </ul>					

#### SAQ Completion Guidance:

Selection of any of the In Place responses for Requirements at 9.5 means that the merchant has policies and procedures in place for Requirements 9.5.1, 9.5.1.2, and 9.5.1.3, and that it maintains a current list of devices, conducts periodic device inspections, and trains employees about what to look for to detect tampered or substituted devices.

# **Maintain an Information Security Policy**

# Requirement 12: Support Information Security with Organizational Policies and Programs

**Note**: Requirement 12 specifies that merchants have information security policies for their personnel, but these policies can be as simple or complex as needed for the size and complexity of the merchant's operations. The policy document must be provided to all personnel, so they are aware of their responsibilities for protecting payment terminals, any paper documents with account data, etc. If a merchant has no employees, then it is expected that the merchant understands and acknowledges their responsibility for security within their store(s).

	PCI DSS Requirement	Expected Testing	(C	heck one re	Response*	ch requireme	ent)
			In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
<b>12.1</b> A co	omprehensive information security policy that governs and p	rovides direction for protection of the	e entity's	information	assets is knov	vn and curre	nt.
12.1.1	<ul> <li>An overall information security policy is:</li> <li>Established.</li> <li>Published.</li> <li>Maintained.</li> <li>Disseminated to all relevant personnel, as well as to relevant vendors and business partners.</li> </ul>	<ul><li>Examine the information security policy.</li><li>Interview personnel.</li></ul>					
12.1.2	<ul> <li>The information security policy is:</li> <li>Reviewed at least once every 12 months.</li> <li>Updated as needed to reflect changes to business objectives or risks to the environment.</li> </ul>	<ul> <li>Examine the information security policy.</li> <li>Interview responsible personnel.</li> </ul>					
Selection	<b>mpletion Guidance:</b> n of any of the In Place responses for Requirements 12.1.1 a plexity of the merchant's operations, and that the policy is re					able for the s	size
12.1.3	The security policy clearly defines information security roles and responsibilities for all personnel, and all personnel are aware of and acknowledge their information security responsibilities.	<ul> <li>Examine the information security policy.</li> <li>Interview responsible personnel.</li> <li>Examine documented evidence.</li> </ul>					

<sup>\*</sup> Refer to the "Requirement Responses" section (page v) for information about these response options.

12.8.5	Information is maintained about which PCI DSS requirements are managed by each TPSP, which are managed by the entity, and any that are shared between the TPSP and the entity.	<ul> <li>Examine policies and procedures.</li> <li>Examine documentation.</li> <li>Interview responsible personnel.</li> </ul>					

#### SAQ Completion Guidance:

Selection of any of the In Place responses for requirements at 12.8.1 through 12.8.5 means that the merchant has a list of, and agreements with, service providers it shares account data with or that could impact the security of the merchant's cardholder data environment. For example, such agreements would be applicable if a merchant uses a document-retention company to store paper documents that include account data or if a merchant's vendor accesses merchant systems remotely to perform maintenance.

	PCI DSS Requirement	Expected Testing	(C	heck one re	Response*	ch requireme	ent)
			In Place	In Place with CCW	In Place with Remediation	Not Applicable	Not in Place
<b>12.10</b> Su	spected and confirmed security incidents that could impact	the CDE are responded to immediate	ely.				
12.10.1	An incident response plan exists and is ready to be activated in the event of a suspected or confirmed security incident.	<ul> <li>Examine the incident response plan.</li> <li>Interview personnel.</li> <li>Examine documentation from previously reported incidents.</li> </ul>					

#### SAQ Completion Guidance:

Selection of any of the In Place responses for Requirement 12.10.1 means that the merchant has documented an incident response and escalation plan to be used for emergencies, consistent with the size and complexity of the merchant's operations. For example, such a plan could be a simple document posted in the back office that lists who to call in the event of various situations with an annual review to confirm it is still accurate, but could extend all the way to a full incident response plan including backup "hotsite" facilities and thorough annual testing. This plan should be readily available to all personnel as a resource in an emergency.

# **Appendix A: Additional PCI DSS Requirements**

# Appendix A1: Additional PCI DSS Requirements for Multi-Tenant Service Providers

This Appendix is not used for merchant assessments.

# Appendix A2: Additional PCI DSS Requirements for Entities using SSL/early TLS for Card-Present POS POI Terminal Connections

This Appendix is not used for SAQ B merchant assessments.

# Appendix A3: Designated Entities Supplemental Validation (DESV)

This Appendix applies only to entities designated by a payment brand(s) or acquirer as requiring additional validation of existing PCI DSS requirements. Entities required to validate to this Appendix should use the DESV Supplemental Reporting Template and Supplemental Attestation of Compliance for reporting and consult with the applicable payment brand and/or acquirer for submission procedures.

# Appendix B: Compensating Controls Worksheet

This Appendix must be completed to define compensating controls for any requirement where In Place with CCW was selected.

**Note:** Only entities that have a legitimate and documented technological or business constraint can consider the use of compensating controls to achieve compliance.

Refer to Appendices B and C in PCI DSS for information about compensating controls and guidance on how to complete this worksheet.

# **Requirement Number and Definition:**

		Information Required	Explanation
1.	Constraints	Document the legitimate technical or business constraints precluding compliance with the original requirement.	
2.	Definition of Compensating Controls	Define the compensating controls: explain how they address the objectives of the original control and the increased risk, if any.	
3.	Objective	Define the objective of the original control.	
		Identify the objective met by the compensating control.	
		<b>Note:</b> This can be, but is not required to be, the stated Customized Approach Objective listed for this requirement in PCI DSS.	
4.	Identified Risk	Identify any additional risk posed by the lack of the original control.	
5.	Validation of Compensating Controls	Define how the compensating controls were validated and tested.	
6.	Maintenance	Define process(es) and controls in place to maintain compensating controls.	

# Appendix C: Explanation of Requirements Noted as In Place with Remediation

This Appendix must be completed for each requirement where In Place with Remediation was selected.

Requirement	Describe why the requirement was initially not in place	Describe 1) how testing and evidence demonstrates that the control failure was addressed and 2) what has been implemented to prevent re-occurrence of the control failure
Example:		
Requirement 5.3.2	The anti-malware solution stopped performing automatic scanning.	Entity identified why the automatic scanning stopped. Process was implemented to rectify previous failure and an alert was added to notify admin of any future failures.

# Appendix D: Explanation of Requirements Noted as Not Applicable

This Appendix must be completed for each requirement where Not Applicable was selected.

Requirement	Reason Requirement is Not Applicable
Example:	
Requirement 3.5.1	Account data is never stored electronically

# Appendix E: Explanation of Requirements Noted as Not Tested

This Appendix is not used for SAQ B merchant assessments.

# **Section 3: Validation and Attestation Details**

# Part 3. PCI DSS Validation

#### This AOC is based on results noted in SAQ B (Section 2), dated (Self-assessment completion date YYYY-MM-DD).

Based on the results documented in the SAQ B noted above, each signatory identified in any of Parts 3b–3d, as applicable, assert(s) the following compliance status for the merchant identified in Part 2 of this document.

#### Select one:

(Merchant Company Name) has	s demonstrated compliance with all PCI DSS requirements included in
marked as Not in Place due to a other requirements are marked Applicable, resulting in an overa	eption: One or more assessed requirements in the PCI DSS SAQ are a legal restriction that prevents the requirement from being met and all as being either 1) In Place, 2) In Place with Remediation, or 3) Not all COMPLIANT BUT WITH LEGAL EXCEPTION rating; thereby
	with a Non-Compliant status may be required to complete the Action Confirm with the entity to which this AOC will be submitted <i>before</i>
are marked as Not in Place, res	ns of the PCI DSS SAQ are complete, or one or more requirements sulting in an overall <b>NON-COMPLIANT</b> rating, thereby <i>(Merchant</i> nstrated compliance with the PCI DSS requirements included in this YYY-MM-DD
either 1) In Place, 2) In Place w	PCI DSS SAQ are complete and all requirements are marked as being ith Remediation, or 3) Not Applicable, resulting in an overall <i>Merchant Company Name)</i> has demonstrated compliance with all PCI his SAQ.
Compliant: All continue of the	

# Part 3a. Merchant Acknowledgement

#### Signatory(s) confirms:

# (Select all that apply)

PCI DSS Self-Assessment Questionnaire B, Version 4.0 was completed according to the instructions therein.
All information within the above-referenced SAQ and in this attestation fairly represents the results of the merchant's assessment in all material respects.
PCI DSS controls will be maintained at all times, as applicable to the merchant's environment.

# Part 3b. Merchant Attestation

Signature of Merchant Executive Officer ↑	Date: YYYY-MM-DD	
Merchant Executive Officer Name:	Title:	

Part 3c. Qualified Security Assessor (QSA) Acknowledgement						
If a QSA was involved or assisted with	QSA performed testing procedures.					
this assessment, indicate the role performed:	QSA provided other assistance. If selected, describe all role(s) performed:					

Signature of Lead QSA ↑ Date: YYYY-MM-DD	Date: YYYY-MM-DD
--	------------------

Lead QSA Name:

Signature of Duly Authorized Officer of QSA Company $igtheta$	Date: YYYY-MM-DD	
Duly Authorized Officer Name:	QSA Company:	

# Part 3d. PCI SSC Internal Security Assessor (ISA) Involvement If an ISA(s) was involved or assisted with<br/>this assessment, indicate the role<br/>performed: □ ISA(s) performed testing procedures. □ ISA(s) provided other assistance.<br/>If selected, describe all role(s) performed:

# Part 4. Action Plan for Non-Compliant Requirements

Only complete Part 4 upon request of the entity to which this AOC will be submitted, and only if the Assessment has a Non-Compliant status noted in Section 3.

If asked to complete this section, select the appropriate response for "Compliant to PCI DSS Requirements" for each requirement below. For any "No" responses, include the date the merchant expects to be compliant with the requirement and a brief description of the actions being taken to meet the requirement.

PCI DSS Requirement*	Description of Requirement	Compliant to PCI DSS Requirements (Select One)		Remediation Date and Actions (If "NO" selected for any
		YES	NO	Requirement)
3	Protect stored account data			
7	Restrict access to system components and cardholder data by business need to know			
9	Restrict physical access to cardholder data			
12	Support information security with organizational policies and programs			

\* PCI DSS Requirements indicated above refer to the requirements in Section 2 of this SAQ.
